Executive Summary

Results-driven DevOps Engineer with practical experience designing and deploying end-to-end pipelines across AWS, Kubernetes, and Terraform. Built production-grade projects spanning CI/CD automation (GitHub Actions, ECS Fargate), GitOps with ArgoCD on EKS, observability stacks (Prometheus, Grafana, Loki), and DevSecOps pipelines with automated vulnerability scanning. Holds AWS Certified Cloud Practitioner certification. Passionate about cloud-native engineering, automation, and infrastructure reliability.

Education:

B.E KUMARAGURU COLLEGE OF TECHNOLOGY.
COMPUTER SCIENCE AND ENGG-2023:2027:-7.85CGPA
COIMBATORE.

SANKARA MATRIC HR SEC SCHOOL
2021-2023,PERALAM,THIRUVARU

Technical Skills:

- Programming Languages: **Java(Intermediate),C(basics)**
- Cloud & Infrastructure:-AWS (EC2, ECS Fargate, EKS, ECR, Lambda, S3, IAM, VPC, ALB)
- Containerization & Orchestration:-Docker · Kubernetes · Amazon EKS
- CI/CD :GitHub Actions
- Infrastructure as Code:-Terraform ·
- Scripting & Programming:-Python (boto3) · Bash · YAML
- Operating Systems:-Linux (Ubuntu) · Shell Scripting
- Version Control:-Git · GitHub

Soft Skills:

- Attention to Detail
- Continuous Learning Mindset
- Time Management Prioritization
- Adaptability in Fast-paced Environments

CERTIFICATES

AWS Certified Cloud Practitioner

Amazon Web Services (AWS) · 2024 · Credential ID:

TNSkills Level-3 Cloud Domain(World Skill 2026).

Tamil Nadu Skill Development Corporation · 2025

Projects:

CI/CD Pipeline on AWS ECS Fargate 2026

Python | Docker | GitHub Actions | AWS ECR | ECS Fargate | ALB | CloudWatch | IAM

- Built 3-stage CI/CD pipeline using GitHub Actions automating test → build → deploy, reducing deployment time from 2+ hours to under 10 minutes
- Containerized Python FastAPI app using multi-stage Docker builds reducing image size by 70% (1GB → 150MB) and pushed versioned images to AWS ECR
- Deployed to AWS ECS Fargate with Application Load Balancer achieving zero-downtime rolling updates across 2 tasks in high availability mode
- Implemented IAM least-privilege access for GitHub Actions with zero hardcoded credentials using encrypted GitHub Secrets
- Configured post-deploy health checks with automatic rollback on failure and CloudWatch log monitoring

Cloud-Based Fitness Chatbot using AWS Lex 2025

AWS Lex | AWS Lambda | API Gateway | Python.

- Built an AI-powered fitness chatbot using AWS Lex with custom intents and utterances to handle user queries on workouts, diet, and fitness advice
- Integrated AWS Lambda as fulfillment function to process Lex intents and return dynamic responses based on user input
- Exposed chatbot via AWS API Gateway REST endpoint enabling seamless frontend integration with a website-based chat interface
- Designed and configured 5+ conversation intents in AWS Lex covering fitness topics with slot types for personalized query handling
- Delivered complete end-to-end serverless chatbot architecture on AWS with zero server management deployed within 5 days

Internships:

Fresher with practical experience gained through independent DevOps projects on AWS and Kubernetes. Seeking an internship role to contribute and grow within a professional engineering team.
